

INFECTIOUS LARYNGOTRACHEITIS (ILT) - FARMER BIOSECURITY ADVISORY

Brock Township, Durham Region

August 16, 2018

On behalf of the four feather boards, the Feather Board Command Centre (FBCC) is issuing an ILT Biosecurity Advisory to all poultry farmers and small flock growers in and near Brock Township in the Durham region.

FBCC has been notified by the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA), that ILT has been diagnosed in a small dual-purpose chicken flock in Brock Township. OMAFRA reports that the veterinarian is vaccinating the remaining birds. No specific location information has been provided as this is an unregistered flock.

Poultry farmers and small flock growers in this area are being contacted and advised to enhance their biosecurity programs. Please reinforce your biosecurity protocols including monitoring the movement of birds, people and equipment onto and off of the farm in the interest of flock health.

Should you suspect any signs of health concerns in your flock, please contact your veterinarian as well as your Board. ILT is a serious contagious disease caused by a respiratory virus primarily in laying hens and chickens. Signs to look out for include: increased mortality, noisy breathing, head-shaking, off feed, decreased egg production, inactivity, ruffled feathers and conjunctivitis.

Please advise any visitors to your premises of your biosecurity protocols because of this situation and keep a logbook of movement in relation to your farm. Minimize visits to other poultry production sites, avoid exchanging equipment with other poultry production sites or ensure that it is washed and disinfected. Ensure all personnel in contact with birds wear boots, protective suits, head coverings and gloves/handwashing. Ensure adequate control of vermin and wild birds.

Further biosecurity information for small flock growers is available at <http://www.inspection.gc.ca/animals/terrestrial-animals/diseases/bird-health-basics/eng/1323643634523/1323644740109>.

We anticipate this advisory to remain in place until late September. A stand down advisory will be issued at the appropriate time. Any updates will be provided through www.fbcc.ca
