

INFECTIOUS LARYNGOTRACHEITIS (ILT) DISEASE: FARMER ADVISORY

United Counties of Prescott and Russell

January 15, 2019

On behalf of the four feather boards, the Feather Board Command Centre (FBCC) is issuing an ILT Disease advisory to all poultry farmers and small flock growers in the United Counties of Prescott and Russell north of Hwy. 417.

FBCC has been alerted by the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA) that a chicken from a small flock of 100 birds has tested positive for Infectious Laryngotracheitis (ILT). OMAFRA staff are working with the flock owner and veterinarian to ensure proper biosecurity and disease control measures are implemented.

Please reinforce your biosecurity protocols including monitoring the movement of birds, people and equipment onto and off of your farm in the interest of flock health. ILT is a serious contagious disease caused by a respiratory virus primarily in laying hens and chickens. Signs to look out for include: increased mortality, noisy breathing, head-shaking, off feed, decreased egg production, inactivity, ruffled feathers and conjunctivitis. Should you suspect any signs of health concerns in your flock, please contact your veterinarian as well as your Board.

Please advise any visitors to your premises of your biosecurity protocols because of this situation and keep a logbook of movement in relation to your farm. Minimize visits to other poultry production sites, avoid exchanging equipment with other poultry production sites or ensure that it is washed and disinfected. Ensure all personnel in contact with birds wear boots, protective suits, head coverings and gloves/handwashing. Ensure adequate control of vermin and wild birds.

Further biosecurity information for small flock growers is available at <http://www.inspection.gc.ca/animals/terrestrial-animals/diseases/bird-health-basics/eng/1323643634523/1323644740109>

We anticipate this advisory to remain in place until early March. A stand down advisory will be considered at that time. Any updates will be provided through www.fbcc.ca
